

Springfield School Year 7 Catch-Up Premium Report 2017-2018 and Allocation for 2018-2019

Springfield School caters for pupils from 2 – 16 years. Our scrutiny of pupil progress shows that our Year 7 pupils do not experience a reduction in their progress as can be seen with some primary mainstream pupils making the transition to secondary schools. We value the fact that we are on two different sites and believe there is a benefit for our pupils to move 'up' to the secondary site. During the summer term each year, we plan for the Year 6 pupils to visit the secondary site on a number of occasions to become more familiar with the environment, staff and pupils. This definitely aids their transition in September.

Springfield uses the Year 7 Catch-Up Premium to support transition, achievement and participation for our Year 6 and 7 pupils. It has also been used to support Literacy resources linked to our Themes and Maths resources to ensure pupils can be participating and developing Literacy and Maths skills across the curriculum.

The Year 7 data shows 100% good or outstanding achievement of EHCP end of year outcomes and all Year 7s are on track to meet their end of Key Stage Outcomes. There was 72% good or outstanding achievement of IEP targets. The pupils' progress is mainly within the median and upper quartiles using the Progression Guidance.

The priorities are to have:-

- familiar experienced staff to support transition
- Literacy resources linked to the Themes
- Geometry resources
- staff skilled in developing Communication, Language and Literacy and Maths.

In 2017 - 2018, the Year 7 Catch-Up Premium allocation was £3,333.

Staffing	Literacy and Numeracy	Training
£1500	£1500	£333
Staff to support transition for the Year 6 pupils. There was very positive transition and annual review reports highlight the success of this from staff and parents. There has been some additional TA support in classes for Year 7s.	Additional Literacy resources have been purchased to support the Themes and Book Lists in Key Stage 3 and across the school. This has included big books, sensory stories and symbol prompts enabling all pupils to access Themes and Literacy based sessions. Additional Geometry resources have been purchased to support work on the School Improvement Plan [SIP].	Maths Learning and Teaching Team had clear focus linked to the School Improvement Plan [SIP]. Non-contact time out of class given to support preparation for Teacher and TA workshops on developing Maths.

Springfield School
